### Human Library (café)

1	Sit down here if you want to get to know someone else! Contrary to the traditional human library concept, the visitor does not choose a person from a specific group that is offered on a “menu”, but by sitting down at a designated table in the café, the visitor shows that he or she is open to a discussion with someone unknown. Then another person – who may be a homeless, homosexual, Roma, ex-convict, sex worker, person with disabilities, Jewish, or whoever – sits down next to the visitor and starts a conversation. The “human book” may reveal his or her identity at any moment, but it depends on both sides. The conversation lasts until one of them says: “Thank you for talking to me”. The conversation partners should both respect the other's opinion, social background and taste. They both have the right to ask anything and to reply or refuse to reply to any question. The most important is that the “book” and “reader” will both continue to enjoy the festival after the conversation.
