OCEAN ECONOMY**

2019 Report

FIVE OCEAN SECTORS

THE OCEAN IS NOT ALWAYS THE VICTIM

THE POLITICS OF GETTING IT DONE

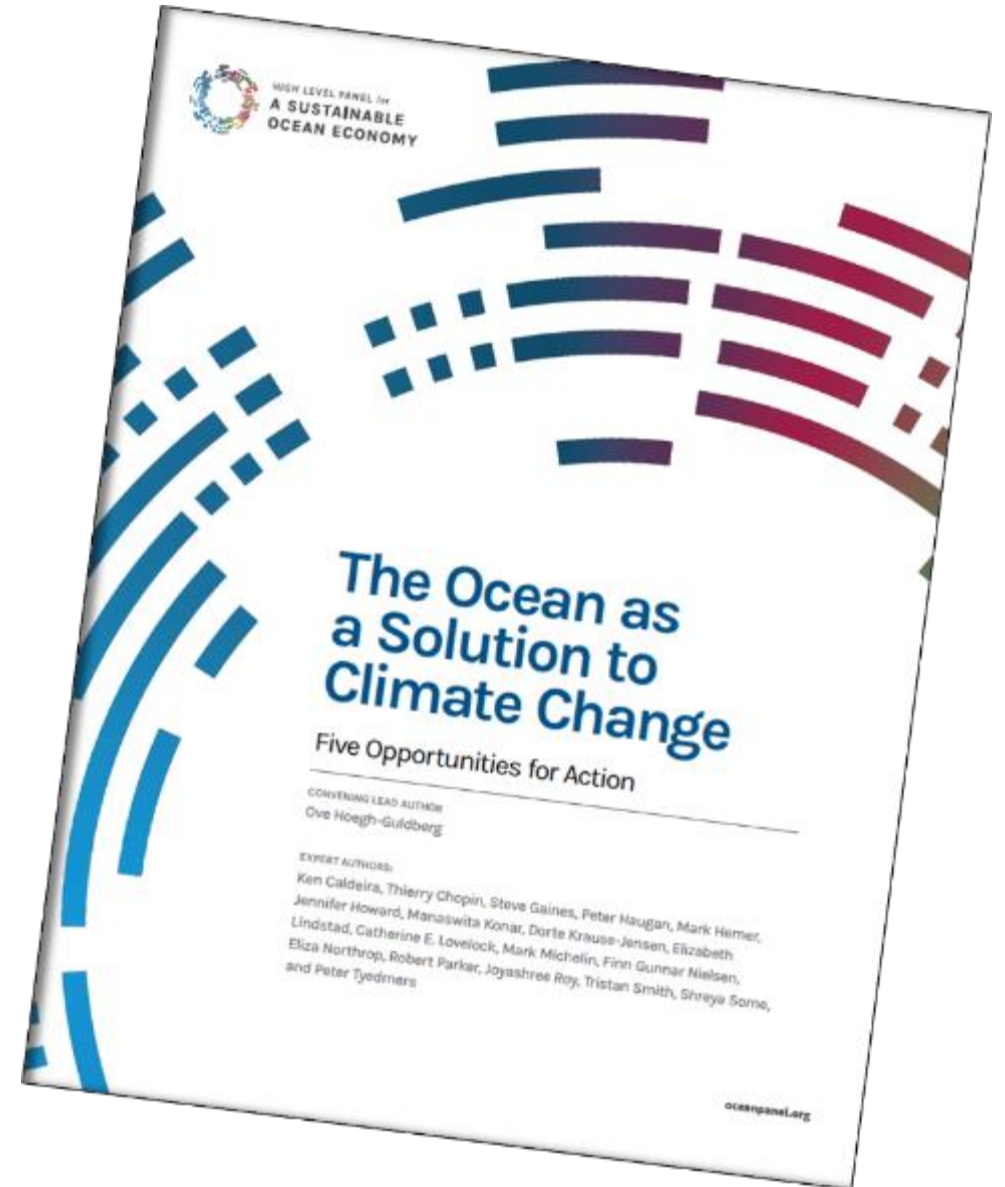

KNOWLEDGE, FEASIBILITY AND SCALE

2023 Report

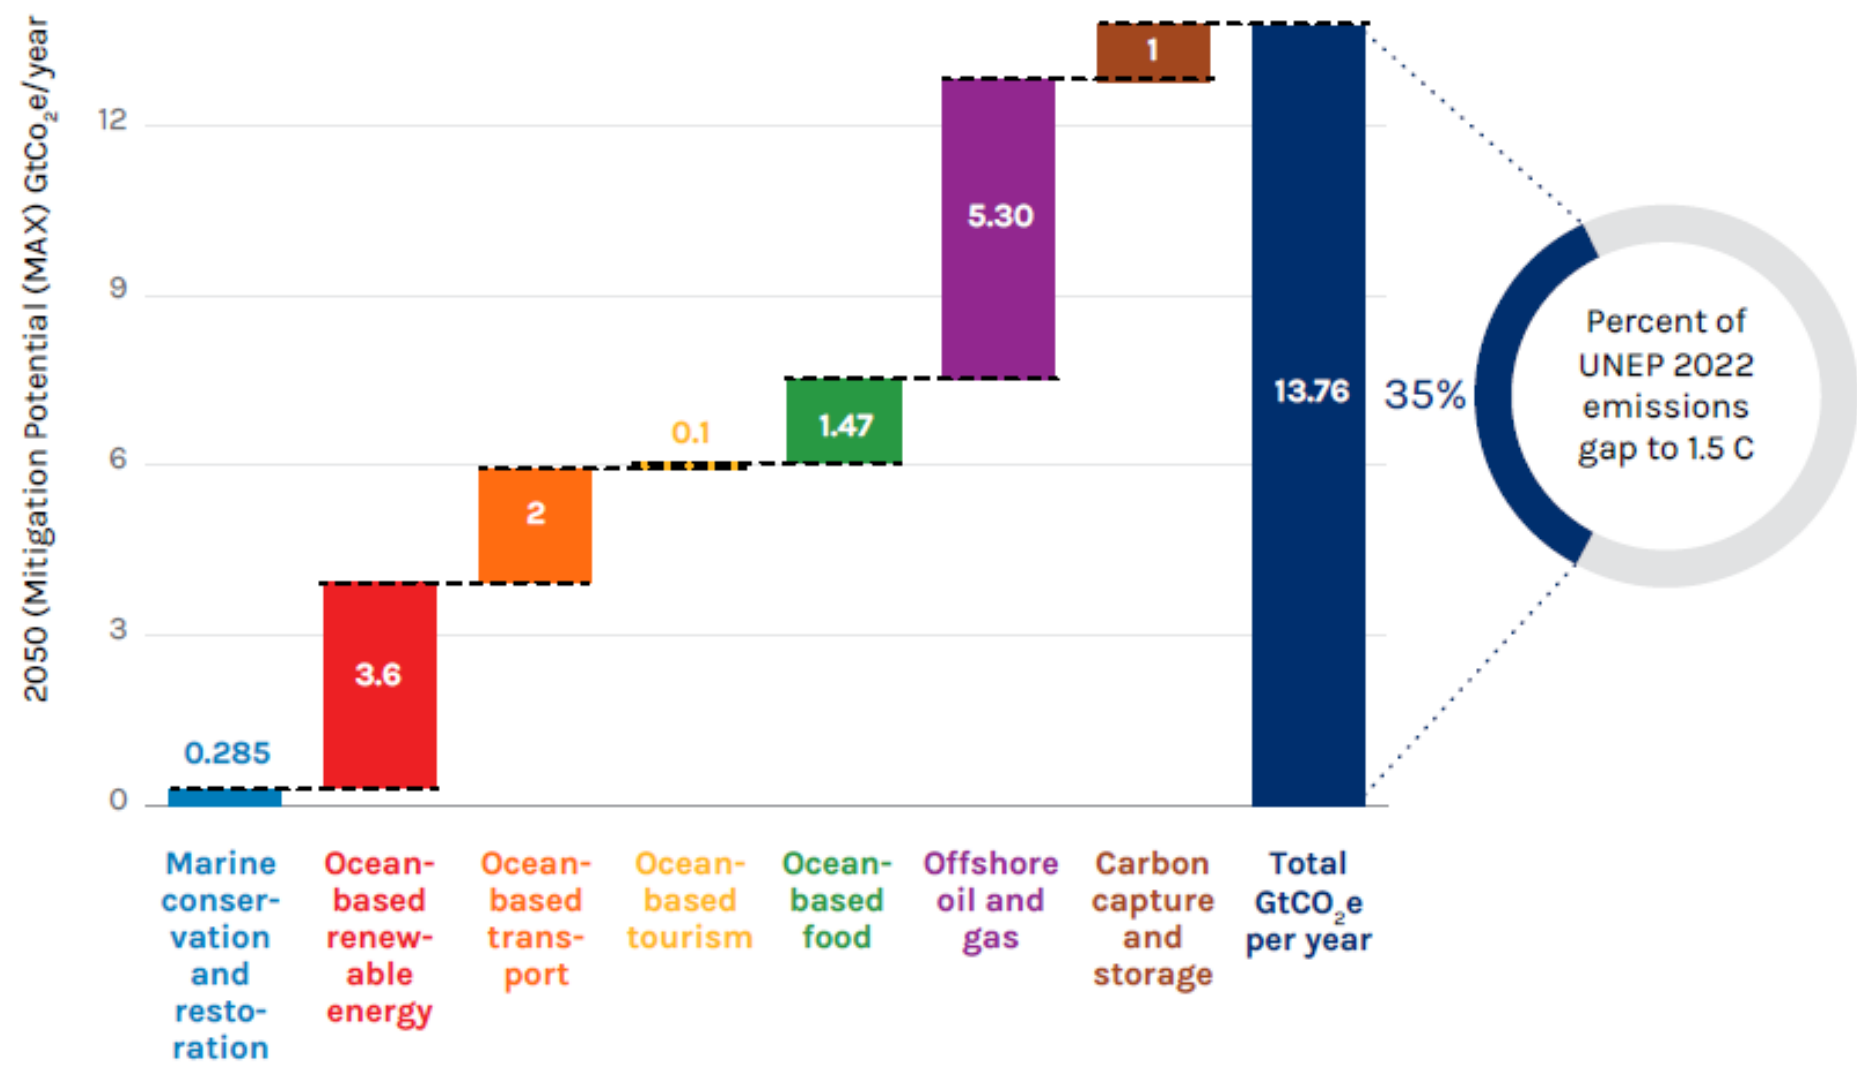

TWO ADDITIONAL OCEAN SECTORS

UPDATED ANALYSIS

By 2030 *'Ambitious climate action has set the world on track to achieve the goals of the Paris Agreement and restore ocean health'*

Potential of ready-to-implement options to closing the gap in 2050

Key message : Food from the ocean is lagging behind

- Some sectors have progressed, but not the shift toward low-carbon sustainable food from the ocean (e.g., fish protein).
- To make things more complicated, human populations continue to increase along with the demand for protein without an increase in sustainable low carbon options from the ocean
- More must be done to raise awareness, rebuild fisheries, send clear policy signals, and invest in the enabling environments needed to take advantage of this opportunity.
